May

May Special: Save on Simparica Trio!

Now through the end of May, we're offering a special on Simparica Trio to help make staying protected even easier:

Buy 6 Doses Get 1 FREE
Buy 12 Doses Get 2 FREE

That's roughly a 15% savings per dose, just for staying consistent with your pet's prevention.

Even better, this offer **can be combined with Zoetis Rewards** from the manufacturer:

With a 6-month supply, most clients receive around **\$70+ in total savings**, and first-time Zoetis Rewards users can **save around \$100+**

With a 12-month supply, most clients receive around **\$160 in total savings**, and first time Zoetis Rewards users can **save around \$190+**

These totals reflect the **combined savings from our promotion and Zoetis Rewards**, making this a great time to stock up and keep your pet protected year-round.

We recommend Simparica Trio for many of our canine patients because it offers **broad, reliable protection** in one simple monthly chew. This all-in-one approach not only simplifies your pet's routine, but also helps **ensure consistent protection**.

Simparica Trio protects against **fleas, ticks, heartworm disease, roundworms, and hookworms**, helping cover both external and internal parasites in a single product. Fleas can lead to **skin infections**, ticks can transmit diseases like Lyme disease, and heartworm disease can **cause serious damage to the heart and lungs**.

What Month is it?

Pet Cancer Awareness

Cancer is one of the **most common** health concerns in pets, particularly as they age. While hearing the word “cancer” can be overwhelming, **early detection and intervention** can significantly improve outcomes and quality of life.

Some signs to watch for include **new lumps or bumps, unexplained weight loss, changes in appetite, non-healing wounds, or changes in energy levels.** Not every change is cause for alarm, but it’s always best to have new or unusual findings evaluated.

Regular veterinary exams play an important role in catching potential issues early. Our goal is to work with you to monitor your pet’s health and discuss options if concerns arise. In many cases, there are **treatment or management options available** that can help pets continue to live happy, comfortable lives.

Arthritis Awareness

As pets age, changes in mobility can happen gradually, making them easy to miss at first.

Arthritis is one of the most common conditions we see in both dogs and cats, and it can significantly impact comfort and quality of life.

Signs of arthritis may include **stiffness, difficulty getting up or lying down, reluctance to jump or use stairs, decreased activity, or even subtle changes in behavior.** Many pets don’t vocalize pain, so these small changes are often the first clues.

The good news is that there are **many ways to help manage arthritis** and keep pets comfortable. Treatment options may include **medications, joint supplements, weight management, and lifestyle adjustments.** Early intervention can make a big difference, so if you’ve noticed any changes in your pet’s mobility, we encourage you to reach out!

Allergy Awareness

Just like people, **pets can experience allergies** that affect their comfort and quality of life, especially as we move into the warmer months.

Environmental allergens such as **pollen, grass, dust, and mold are common triggers** this time of year. Pets with allergies often show signs like **excessive itching, licking or chewing at the paws, ear infections, or red, irritated skin.** Some pets may also experience recurrent hot spots or hair loss.

The good news is that allergies can often be **managed effectively with the right approach.** Treatment options may include medications, supplements, and adjustments to your pet’s environment or routine. If you’ve noticed your pet **itching more than usual or showing signs of skin irritation,** our team is here to help identify the cause and create a plan to keep them comfortable!

Luna's Story!

May 20th is National Rescue Dog Day and we would like to share a story about a patient of ours named Luna and how she came to be with her forever family!!

Our family started fostering with the Golden Retriever Rescue of Iowa in June of 2025. Since then, we have been lucky to have 4 dogs join our family for varying lengths of time before moving to their forever families.

In December of 2025, we traveled to Missouri to bring Birdie into our home. We knew she was a young girl who had already had a litter of puppies. She was being rehomed due to not getting the attention she deserved due to a family member's medical needs. At first, she was shy and scared but then jumped right

into our van and began to snuggle with our sons and give kisses. On the drive home, she made her way onto my lap in the front seat where she settled her 68 pounds of love.

The night she came home with us, she decided to choose us as her forever family. She played fetch with the boys which is still her favorite pastime and snuggled right into our bed where she sleeps now each night. We knew from the first night that she would be our first foster-to-forever. We decided to name her Luna after our favorite Harry Potter character.

Luna has already had the chance to teach another foster pup the ropes of being in a loving home. She spends her days sleeping while dad works from home, getting belly scratches, and listening for the bus so her boys can throw her ball. In the past 5 months she has grown into a confident dog who loves to go on car rides and come with us on any family adventure.

Join us for Four Seasons Fest!

We're excited to be part of Four Seasons Fest coming up on June 26th and 27th! We will be participating in the parade with a float, and we'd love to see some familiar faces there. It's a great opportunity to connect with the community, enjoy the festivities, and celebrate the start of summer.

If you'll be attending, keep an eye out for us in the parade! We can't wait to share the fun with you!
